2026 Edition

What's in This Pack

Seven documents: three built for hiring subs, and the four contract templates you need once you have picked one.

Form	Document	Pages	Editable Word version
SH.1	Subcontractor Interview Scorecard	4	—
SH.2	Reference Check Form	3	—
SH.3	Hiring Walkthrough	3	—
2.1	Subcontractor Agreement Template	7	Yes — editable-word/
2.2	Change Order Form	5	Yes — editable-word/
2.3	Lien Waiver Templates	6	Yes — editable-word/
2.4	Payment Draw Schedule	6	Yes — editable-word/

Forms 2.1 to 2.4 sit in the **contracts/** folder and are the same documents that ship in Section 2 of the Owner-Builder Job Site Binder. Their Word versions are in **editable-word/**.

HOW TO USE IT

- Read **SH.3 Hiring Walkthrough** first. It is the order everything else happens in, and it takes five minutes.
- Print one **SH.1** and three **SH.2** sheets for every candidate you take seriously — one scorecard per sub, one reference sheet per reference call.
- Fill in the Word versions of the contracts with your project details, print them, and sign before anyone starts work.
- Keep the completed sheets. If a job goes sideways later, the paper you filled in before you hired is the record that protects you.

Before you rely on anything in here

These documents are general templates for reference, not legal advice — have your attorney review any contract before you use it. Licensing requirements, deposit limits, workers'-compensation exemptions and lien deadlines are set by state law and vary widely. Verify your own state's rules with its licensing board and your county recorder.

*This pack is the hiring half of the **Owner-Builder Job Site Binder** — the full binder carries 40+ forms across permits, foundation, rough-in, inspections, daily logs and budget. build-your-house.com*
