

6.1 Daily Job Site Log

Your primary record of everything that happens on site — one entry per working day.

PURPOSE: The Daily Job Site Log is your primary record of everything that happens on your construction site. Complete one entry for each day work occurs. This log serves as documentation for insurance claims, disputes, schedule tracking, and your own peace of mind.

Instructions

- Fill out this log at the end of each work day while details are fresh
- Be specific and detailed — you may need this information months or years later
- Record actual hours, not estimates
- Note anything unusual, even if it seems minor at the time
- Take photos throughout the day and reference photo numbers in your log
- Keep completed logs in chronological order in this binder

Tips for Effective Daily Logging

- Make entries consistent and complete — establish a routine
- Record conversations and verbal agreements
- Note weather conditions that affect work
- Document any changes from the original plan
- Keep entries factual and objective

How to use these sheets

A full-detail log follows, then three abbreviated daily templates for routine days. Photocopy whichever version suits the day and file the completed sheets in date order.

DAILY JOB SITE LOG — FULL DETAIL

Date: _____ Day of Week: _____

SITE CONDITIONS

Weather: _____ Temperature: _____

Hours on Site — Start: _____ End: _____ Total Hours: _____
